ACCESSIBILITY

**SECOND PRIZE:
PUZZLE**

NON-CODING TRACKS

Community Resilience Example Prompts

1. Develop an app or web-based system that enables community organizations to manage their volunteer programs more effectively. The platform should include features such as volunteer sign-up and scheduling, training and orientation materials, and performance tracking.
2. Create a website that helps UIC students find each other based on their interests / grade level / and major

Bridging the Digital Divide Example Prompts

1. Develop an app or web-based system that enables community organizations to manage their volunteer programs more effectively. The platform should include features such as volunteer sign-up and scheduling, training and orientation materials, and performance tracking.
2. Create a website that helps UIC students find each other based on their interests / grade level / and major

Accessibility Example Prompts

1. Create an app that helps people buy healthy food if they live in a food desert
2. Develop a tool that enables community members to track their health and wellness over time. The device should include features such as exercise and nutrition tracking, goal setting, and personalized health recommendations.
