What is Leaf?

 Leaf is a student-led organization focused on encouraging more women to invest in the stock market

 We give opportunities to work on development projects

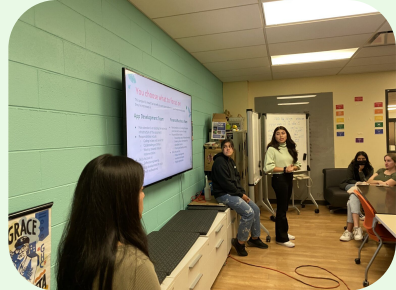

@leafproject_uic

leaf.digital.uic.edu

• The Project

- An educational tool that teaches women how to start investing in a fun game-like setting while providing a social media aspect that creates a welcoming environment

• Workshops

- Topics include: how did the stock market start, brokerage accounts, smart investment strategies, how to choose stocks, what stocks are, best money management skills, etc.

1st Best Bridging Digital Divide

Tech4All - Bridging the Technological Divide

Tech4All exists to bridge the digital divide. We have made an easy to use and accessible app that helps connect those who struggle with technology, with our team of expert volunteers.

The screenshot displays the Tech4All app interface. At the top, the title 'Tech4All - Bridging The Technological Divide Sparkhacks UIC 2023' is visible. Below the title, a prompt says 'Click the button that best describes what you need help with;'. A vertical menu of buttons is shown: 'Spanish' (red), 'Phone' (green), 'Computer' (green), 'Internet' (green), 'Other' (green), and 'Interested in volunteering?' (blue). A red play button icon is overlaid on the 'Computer' button. To the right of the menu is a 'Copy link' button. The interface is set against a dark green background.

UIC GO

A networking app for UIC students, drawing inspiration from Pokemon Go

2nd Best Accessibility

TrackGuide

Tracker Guide is the fitness app for achieving your health and wellness goals. personalized meal and workout plans target community problems like weight loss. Say goodbye to generic plans.

Inspiration

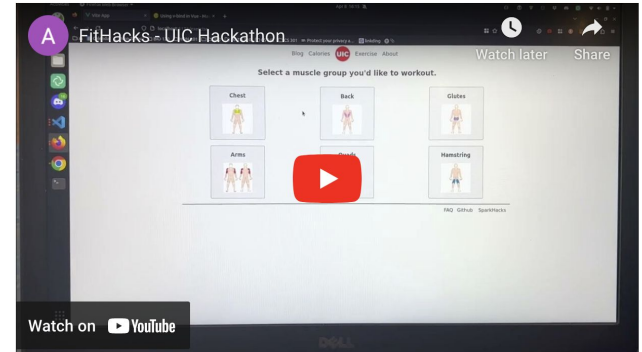

We created my fitness app to inspire and empower individuals to achieve their health and fitness goals. We believe that everyone has the potential to live a healthy and fulfilling life, and with the right tools and support, they can unlock that potential. Our app provides a comprehensive platform that offers personalized recommendations, tracking, and a supportive community to help users stay motivated and accountable. We are passionate about helping people transform their lives through fitness, and my app is my way of making that vision a reality.

1st Best Accessibility
